Welcome to the **University Survey System!** This software was developed for the EWU Career Services Department to help to assess the effectiveness of their offerings, and to improve their engagement with both faculty and students.

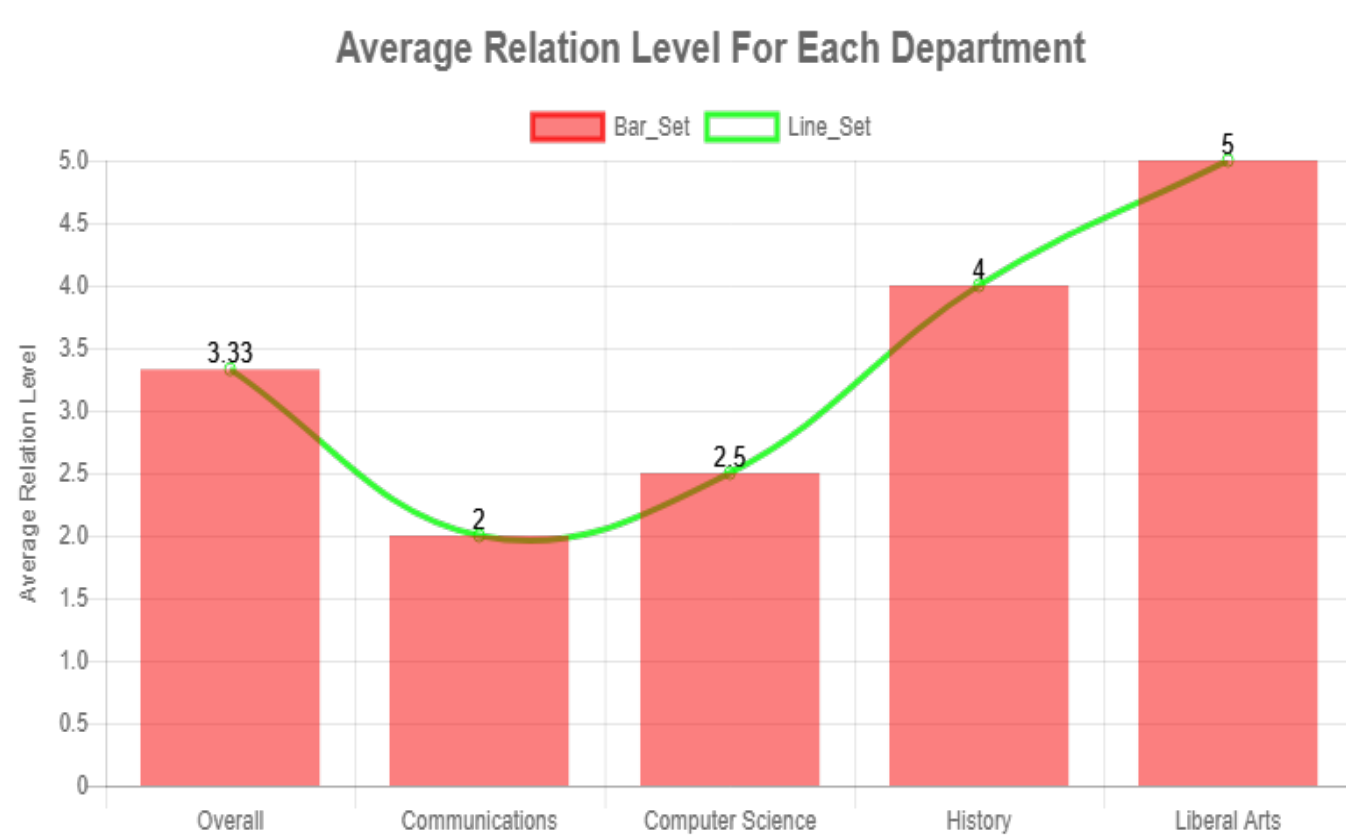

An attractive, easy-to-use, EWU-themed interface, and numerous choices for survey configuration make this system well suited to numerous applications.

Results are formatted for easy analysis, and are exportable in both CSV and PDF formats for use with other software.

Test Survey 2 Report

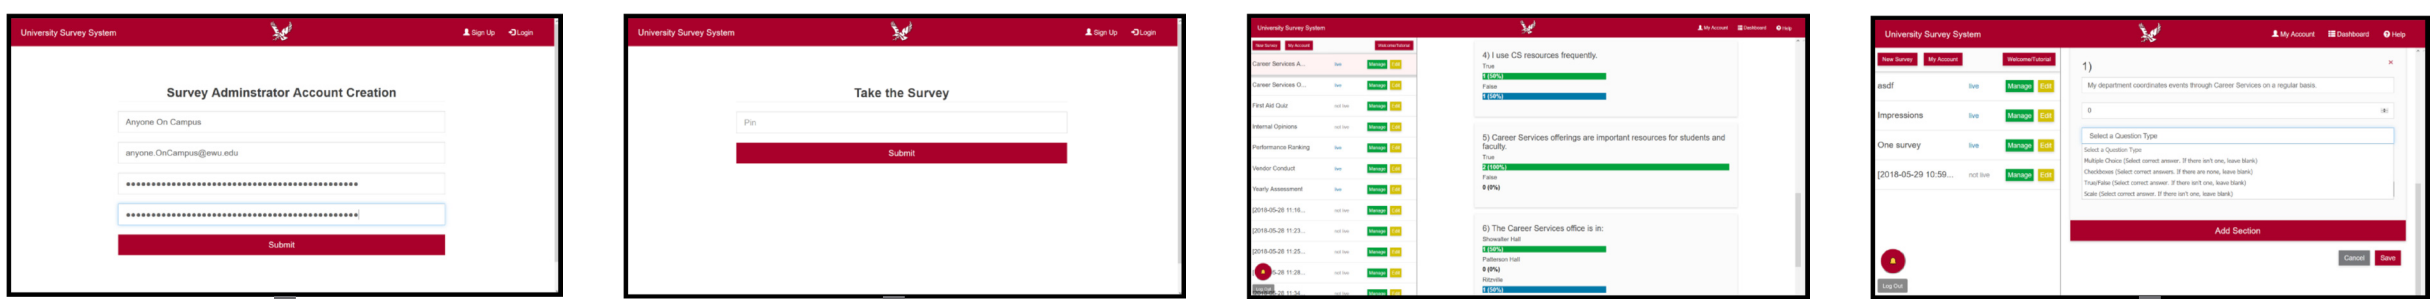

Average Relation Levels

Overall	Communications	Computer Science	History	Liberal Arts
3.33	2	2.5	4	5

Defining the Terms on the Continuum

Our system provides functionality to offer instant feedback and resources according to the level of proficiency attained on the continuum.

It's mobile-friendly, so users can take surveys and admins can create surveys and view results anytime and anywhere.

In addition to the specific functionality developed for Career Services, the USS has also been designed as a general-use survey system for all EWU faculty, without the ads, clutter, and cost of other options.
